EndNote 20

Endnote 20 je program - orodje za upravljanje referenc in citiranje, ki omogoča lažje delo pri iskanju, organiziranju in deljenju referenc.

Orodje omogoča:

- zbiranje informacij iz elektronskih in tradicionalnih virov,
- **organizacijo referenc** po lastnih potrebah,
- **sinhronizacijo** (ter varnostno kopiranje) s spletno različico **EndNote Basic** preko uporabniškega računa **My EndNote Web**,
- **neomejen** spletni pomnilniški prostor za hrambo referenc in priponk,
- vodenje **več samostojnih knjižnic referenc** oz. osebnih podatkovnih baz,
- razvrščanje referenc v poljubne **skupine** (npr. po projektih),
- **avtomatsko razvrščanje** referenc v skupine glede na poljubne parametre,
- **deljenje ene celotne knjižnice z (do 400) drugimi uporabniki** orodja EndNote X7, X8 ali X9,
- **sledenje spremembam**, ki so jih izvedli uporabniki, s katerimi delimo knjižnico referenc,
- oblikovanje referenc po lastnih potrebah in **vstavljanje citatov in bibliografij med pisanjem besedila** z naloženim vtičnikom v urejevalniku besedil *Cite While You Write*,
- možnost uporabe **več kot 7000 različnih citatnih slogov**,
- prilagajanje obstoječih in **ustvarjanje lastnih citatnih slogov**,
- **zajemanje in shranjevanje bibliografskih informacij**, predstavljenih na spletni strani, z dodatkom v spletnem brskalniku *Capture*,
- integrirano iskanje po **podatkovnih bazah** oz. **katalogih** (npr. PubMed)
- **posodabljanje metapodatkov** glede na zapise v spletnih bazah,
- samodejno preverjanje shranjenih člankov v zbirki **Retraction Watch**,
- **pridobivanje celotnih besedil** v formatu PDF,
- **integriran pregledovalnik besedil v formatu PDF** z možnostmi za označevanje besedila ter dodajanje beležk,
- **ročno vnašanje** referenc ali **uvoz** referenc v raznih formatih,
- **izvoz** v formatih RTF, TXT, HTML,
- dodajanje **priponk** k referencam (npr. dokument PDF, slika, mp3...),
- iskanje **primerne znanstvene revije** za objavo članka,
- in še mnogo več.

Na teh straneh boste našli koristne napotke kako uporabljati orodje.

Navajanje virov in plagiatorstvo

Kdaj je potrebno?

- ✓ kadar vir dobesedno navajamo
- ✓ ko ga povzamemo
- ✓ ali parafraziramo

Kdaj ni potrebno?

- ✗ splošno znana dejstva
- ✗ vaše lastno mnenje

Kako se izogniti plagiatorstvu?

Nekaj predlogov

načrtujte vnaprej – v časovni stiski se hitro zgodi napaka

vire dokumentirajte takoj – še posebej radi se izgubijo spletni viri

vir dokumentirajte popolno (ne izpuščajte podatkov)

ločite vaše zabeležke od delovne verzije – tudi v zabeležkah označite in citirajte parafraze

vir preberite v celoti – iztrganost iz konteksta se hitro maščuje

kadar ste v dvomu - vprašajte

Dear Sir,

We are happy to announce to you that IOSR Journals (www.submitpapersnow.com) have come under **AQCJ - 2021 Top 10 Journals Ranking**. It was calculated on the basis of "Google Scholar Citation" of published articles.

IOSR Journals got 9th Ranking by AQCJ (African Quality Center for Journals) - Top 10 Journals Ranking.

IOSR Journals provides DOI (Digital Object Identifier) to each article. IOSR Journals DOI is 10.9790

Papers are invited for IOSR Journals January 2022 Issue related to all fields of Engineering, Management, Medical & Dental Science, Pharmacy, Applied Sciences, Nursing, Humanities and Social Science etc.

Important Dates	
Submission last date :	15 January 2022
Acknowledgement of submission :	Within 24 hrs
Acceptance notification :	After 03 Days of submission (Blind peer review process)
Publication Date :	25 January 2022

Author can submit paper through following ink: <http://iosrjournals.org/how-to-submit.html>

About

As a long lasting highly cited peer reviewed periodical, SYLWAN is a well-known scientific journal printed in Poland since 1820. The journal initial steps were under the supervision of the semi-official organ of the Royal Forestry Corps in Poland. Since 1966 it has developed its coverage areas to all aspects of the life sciences. The journal language was formerly in Polish with English abstracts only, but since 2004 the English edition of the periodical started the publication of pioneer researches in full text English to extend its readers and audiences worldwide. Today, as a well trusted scientific periodical, SYLWAN is abstracted and indexed in Science Citation Index with the impact factor of 0,691. So foremost, we owe our thanks to the authors who have decided to entrust SYLWAN with their best work, allowing us to benefit from the high quality of their scientific endeavors. We hope to remain worthy of their trust and to continue providing a rigorous and respected environment for their publications.

Rapid Genetic and Developmental Morphological Change Following Extreme Celerity

Thomas Paris, Harry Kim, B'Elanna Torres, Kes Ocampo, Kathryn Janeway

Abstract: Proximate environmental effects on metamorphosis have been explored in many vertebrate systems, but less attention has been devoted to how the environment affects morphological change in mammals. Understanding proximate environmental effects on mammalian morphological change, particularly changes involving skin replacement, may aid in the design of the rapеutic strategies to address severe burn or other debilitating injuries. Here, we specifically explore effects of celerity broadly, and we present results showing rapid change in mammalian morphology following encountering maximum celerity. Morphological changes were pronounced with in 96 hours and included at least partial regeneration of both skin and organs as well as an elevated somatic mutation rate. Significantly, this high mutation rate did not result in detectable loss of fertility or viability of offspring. Overall, our findings strongly suggest that extreme celerity, an environmental factor rarely considered, can produce strikingly rapid developmental changes in morphology even in mammalian systems and open the door to future studies on the impact of celerity on genetics and morphology.

Keywords: celerity, morphology, development, genetic

DISCUSSION

We sought to explore the effects of extreme celerity on developmental morphological change in a model mammalian system. Replicates were exposed to theoretical maximum celerity and assessed for developmental and genetic alterations as a result. We found that celerity induced major changes in internal and external form as well as an elevated mutation rate. This study is the first to identify celerity as a potentially major force in such developmental changes, arguably increasing the pace of evolution.

While the developmental morphological changes are striking, the somatic mutation rate increase was wholly unexpected. Other studies have found a median somatic mutation frequency of 2.8×10^{-7} and 4.4×10^{-7} per bp per cell mitosis for human and mouse respectively for single nucleotide sites (e.g., Milholland et al 2017), so our observed somatic mutation rate following extreme celerity is roughly 100 times higher. Importantly, we failed to find evidence that this mutation rate increase had severe effects on fertility or offspring viability.

While our results are preliminary at present, these findings have major basic and applied science research implications. From an applied standpoint, induction of such radical turnover of skin and internal morphological

Food choices to meet nutrient recommendations for the adult Brazilian population based on the linear programming approach

Quenia dos Santos^{1,2,*}, Rosely Sichieri¹, Nicole Darmon³, Matthieu Maillot⁴ and Eliseu Verly-Junior¹

¹Institute of Social Medicine, State University of Rio de Janeiro, Rio de Janeiro, RJ, Brazil; ²Food Design and Consumer Behaviour Section, Department of Food Science, University of Copenhagen, Rolighedsvej 26, 1958 Frederiksberg C, Denmark; ³Markets, Organizations, Institutions and Stakeholders Strategies, Institut National de la Recherche Agronomique (INRA), Montpellier, France; ⁴MS-Nutrition, Marseille, France

Submitted 6 June 2017; Final revision received 31 October 2017; Accepted 27 November 2017; First published online 18 January 2018

Abstract
Objective: To identify optimal food choices that meet nutritional recommendations to reduce prevalence of inadequate nutrient intakes.
Design: Linear programming was used to obtain an optimized diet with sixty-eight foods with the least difference from the observed population mean dietary intake while meeting a set of nutritional goals that included reduction in the prevalence of inadequate nutrient intakes to ≤20%.
Setting: Brazil.
Subjects: Participants (men and women, n 25 324) aged 20 years or more from the first National Dietary Survey (NDS) 2008–2009.
Results: Feasible solution to the model was not found when all constraints were imposed; infeasible nutrients were Ca, vitamins D and E, Mg, Zn, fibre, linolenic acid, monounsaturated fat and Na. Feasible solution was obtained after relaxing the nutritional constraints for these limiting nutrients by including a deviation variable in the model. Estimated prevalence of nutrient inadequacy was reduced by 60–70% for most nutrients, and mean saturated and trans-fat decreased in the optimized diet meeting the model constraints. Optimized diet was characterized by increases especially in fruits (+92 g), beans (+64 g), vegetables (+43 g), milk (+12 g), fish and seafood (+15 g) and whole cereals (+14 g), and reductions of sugar-sweetened beverages (−90 g), rice (−63 g), snacks (−14 g), red meat (−13 g) and processed meat (−9.7 g).
Conclusion: Linear programming is a unique tool to identify which changes in the current diet can increase nutrient intake and place the population at lower risk of nutrient inadequacy. Reaching nutritional adequacy for all nutrients would require major dietary changes in the Brazilian diet.

Keywords: Linear programming, Nutrients, Food selection, Diet modelling, Diet optimization

Prevalence of inadequate nutrient intake is high in many parts of the world^(1,2), including Brazil. According to the last Brazilian National Dietary Survey (2008/2009), the prevalence of inadequate nutrient intake is greater than 70% for Ca, vitamins D and E, Mg and vitamin A in the adult and elderly population^(3,4). Diet optimization methods can be used as a tool for achieving nutrient goals while planning feasible diets based on local and culturally specific foods for either a population or individuals^(5–7). Diet optimization is based on linear programming, which is a mathematical method that optimizes (minimizes or maximizes) a defined function (e.g. the least cost; the least difference between optimized and observed diets) while respecting multiple constraints, such as a set of nutrient recommendations. This method has been used in previous studies to formulate dietary patterns in accordance with nutrient-based recommendations^(8,9) and to assess the impact of cost^(10,11) and environmental constraints⁽¹²⁾ on nutritionally adequate food choices. Studies conducted using diet optimization in Europe, the USA and Asia, among others, have identified the main dietary modifications needed to fulfil nutrient recommendations in the range of acceptable consumption constraints, at the population level^(8,13,14). However, applying results from these countries is difficult because food intake in Brazil has peculiarities, such as consumption of rice,

Title: Care home staff's experiences and views of supporting the dietary management and choices of older residents with obesity

Authors: Juliana Thompson Associate Professor (Adult Nursing)¹ | Mark Parkinson Research Assistant² | Robyn Coltery Dietitian³

Abstract: Increasing numbers of older people with obesity living in care homes is an international phenomenon. Addressing dietary management of residents with obesity is a cause of debate and controversy. On one hand, the 'obesity paradox' suggests obesity protects against morbidity in frail older people. On the other hand, obesity reduces functional status and restricts activity for this group. This paper considers care home staff's experience and views of supporting dietary management and choice for residents with obesity within the context of this controversy.

Keywords: Obesity, Older people, qualitative, weight management

Relationships between lifestyle of health and sustainability and healthy food choices for seniors

M.-J. Kim, C.-K. Lee, W. Gon Kim and J.-M. Kim

International journal of contemporary hospitality management 2013 Vol. 25 Issue 4 Pages 558-576

DOI: 10.1108/09596111311322925

doi:10.1108/09596111311322925

Purpose - The purpose of this paper is to examine the structural relationships among lifestyle of health and sustainability (LOHAS), healthy food choices, trust, and emotional loyalty and the moderating role of age between seniors and non-seniors in restaurants. **Design methodology approach** - Partial least squares (PLS)-graph software (version 3.0) was used to analyze the measurements and structural models. The authors employed a PLS regression analysis for both the formative and reflective constructs in the empirical test of the research model. **Findings** - The study revealed that the senior market segment differs from the non-senior market segment in the following ways: the magnitude of impact of LOHAS on healthy food choices is much stronger for senior diners than for non-senior diners and the impact of LOHAS on trust and emotional loyalty is greater for seniors than non-seniors. **Research limitations implications** - The results of this study can guide the restaurant industry in its research on the implications of LOHAS for seniors. **Practical implications** - Restaurant marketers should develop different strategies for the senior and non-senior market segments, and they need to focus on target segments rather than attempting to appeal to the market as a whole. **Originality value** - This paper assists researchers and practitioners by shedding light on the differences among LOHAS, healthy food choices, trust, and emotional loyalty between senior and non-senior diners.

The University of Maribor Library Digital Repository

*Abstract:

Purpose: Paper presents a portal for browsing the University of Maribor Library (UML) digitised materials. The outline and contents design of the UML Digital Repository (DR UKM) as well as the software platform and the technical solutions are presented. The thematic collections for promotion of Maribor and Štajerska cultural heritage are emphasized. An emphasis is put on the presentation of the metadata scheme, in which the metadata for DR UKM are consistent with the COMARC/B format. Usage and licence information are also provided. The article stresses the repository's usability, as the digitised materials are available for different public and different purposes, like teaching, research or simply browsing.

Methodology/approach: After examining good practice examples and due to the necessity of providing the UML materials also in digitised form, we decided to establish the DR UKM. An outline and contents design were prepared, collections to be digitised were selected, the software platform, the interface, and the metadata scheme, which enables connectivity with other systems in open access, were prepared.

Results: A portal for browsing the UML digitised materials with the emphasis on open access to cultural heritage, which can be connected to other digital repositories, was established. With the DR UKM the UML contributes to shaping the virtual world of knowledge; with digitising precious cultural heritage of the university, the city and the region it ensures a wide access to cultural goods.

Originality/practical implications: The DR UKM was built by the University of Maribor professionals' own knowledge. It offers a wider accessibility and it protects rare and antiquarian materials 24/7; it also enables cooperation among libraries on the national and local level. Exchange of information and digitised objects as well as their searching are simplified.
